

W3.1 HOW WOULD NATURE...?

Questions

Now that you have identified and focused in on a challenge to work on, have a go at thinking about how nature might solve this. To begin with, turn your *'how might we'* question into a simpler *'how would nature'* question.

For example, rather than asking "How does nature make cyclists more visible at night?" we ask "How does nature enhance visibility in low light conditions?" This simplified question expresses what the design is trying to do.

**The following online resources might help you:**

Five tips and suggestions to help you can be found here:
