

Copycat the Lizard

On the table are all kinds of material to work with. **Read the text below thoroughly.**

A

Gekko can, just like flies walk against the wall and hang upside down on the ceiling.

By looking closely at the feet of the gekko man has developed a kind of tape that is very strong.

A. On the table are two big plexiglass plates (wet and dry) and two small plates (wet and dry) that are covered with gekko tape.

B. Take the small dry plate and stick it to the big dry plexiglass plate. Press firmly. Now try to take it off! Did you succeed?

0 easy

0 hard

0 not at all

C. Take the small wet plate and stick it to the wet plexiglass plate. Press it firmly. Now try to take it off. What do you notice?

.....

D. Why do you think a gekko will never sit on a wet window?

.....

E. In the small bin on the table lies a plate with gekko tape. Take care that the plates stay dry. There are also some objects in the bin with different weights. Stick an object on the tape and turn the plate upside down. Which object sticks? Do you dare to stick your mobile phone on the gekko tape? Write down your results.

Subject	It sticks
	Yes / no

	Yes / no

F. Gekko tape sticks very well, you can use it again and again and it does not leave glue residue.

Do you have a suggestion for using Gekko tape?
